

CHAPTER 5

EXPECTED OUTCOME

5.1 Functional outcomes

- **Personalized Recommendations:**
 - The app should provide users with outfit and style recommendations tailored to their preferences, body type, past interactions, and current fashion trends.
 - Include seasonal suggestions and event-specific outfits.
- **Seamless User Experience:**
 - Easy navigation, intuitive interfaces, and quick load times.
 - A visually appealing design that aligns with the fashion theme.
- **Wardrobe Management:**
 - Ability for users to upload their wardrobe and get recommendations based on what they own.
- **AI-Powered Styling:**
 - Use AI/ML algorithms to analyze user preferences, such as liked/disliked items or style quizzes.
 - Implement image recognition for scanning clothing items or identifying styles from photos.
- **Integration with E-commerce:**
 - Suggest purchasable items from partner stores or marketplaces, with links for easy checkout.
 - Dynamic price tracking and discount alerts.
- **Social Features:**
 - Community-based feedback or sharing, such as letting users share outfits for votes or comments.
 - Integration with social media platforms for easy sharing.
- **Outfit Visualization:**
 - Virtual try-ons using AR (augmented reality).
 - Mix-and-match functionality for experimenting with different styles.
